

Barrus show latest engines at Saltex

Barrus had on show the latest petrol and diesel engines from the well-known brands of Yanmar, John Deere and Kohler.

New to the Yanmar line-up is the electric controlled 4TNV98 direct injection engine that meets EPA Tier 3/ Interim Tier 4 for the USA and stage 3a for Europe. This engine is part of the TNV family of water-cooled engines which feature electronic EGR, electronic governing and fuel equipment.

John Deere has now introduced its new range of Tier

2 gen-set engines to meet the new European emission regulations. The range will cover 34kva through to 444kva.

Kohler can now offer petrol engines up to 38hp with the new V-Twin engine family. The number of applications for the Kohler range of engines is increasing as are the number of OEM'S with particular success being gained with the new Courage range from 15 to 27hp.
